

LARGE DISTRIBUTION

Under directed temperature

Temperatures control for individuals !

In your refrigerator:

Soon available in
supermarket :

In your freezer:

Yes ! Individuals can also control the good performance of their refrigerator and freezer! Then, they can serenely weekend or leave in holidays. In case of an anomaly, the GIOVATEMP will signal them any incident (power failure, malfunctioning, etc...) during their absence.

Temperatures control for suppliers

Rigid or flexible

From the producer to the consumer, the cold chain must be respected; it will allow to show that all sensitive products to the temperature have been transported in good conditions.

ANNITEMP is the first indicator with a label size, flexible and auto-adhesive, which can be enabled with times and temperatures adapted to the current standards.

Today, our suppliers have efficient tools to guarantee us the products quality.
